

برنامه ارائه مقالات در روز چهارشنبه 93/11/1		
عنوان	نویسندگان	مکان ارائه
از ساعت 13:30 الی 14		
The bohr compactification for groupoids	F. Behrouzi	کلاس 306
Orthogonality relations for square integrable representations of homogeneous spaces	F. Esmaeelzadeh, R. A. Kamyabi gol and R. Raisi Tousi	کلاس 307
Weak shadowing property for iterated function systems	M. Fatehi Nia	کلاس 308
r-hypergroupoids associated with metric spaces	S. Mirvakili and R. Manaviyat	کلاس 310
از ساعت 14 الی 14:30		
Phi-Biprojective Banach algebras	Z. Ghorbani	کلاس 306
A new inner product on $L^2(\mathbb{R}^2)$ and orthogonality with respect to it	A. Askari Hemmat and B. KH. Mousavi	کلاس 307
On the ratio of the arithmetic and geometric means for the sum of divisors function	M. Ghorbani	کلاس 308
Robust blind image watermarking based on multiwavelet transform and singular value decomposition	M. Mardanpour and M. A. Zare Chahooki	کلاس 310
از ساعت 14:30 الی 15		
Multiresolution analysis and Wavelets on local fields of positive characteristic with some examples	Z. Rahbani, A. Askarihemmat and R. Motamedi Zadeh	کلاس 306
Extension of bi-derivations to the bidual of a C^* -algebra	A. Erfanian Attar, S. Barootkoob and H.R. Ebrahimi Vishki	کلاس 307

Computational methods for solving stochastic optimal control problems	B. Kafash	كلاس 308
A survey for the maximum numerical radius of a matrix	A. Askarizadeh, H. R. Afshin and R. Ruholamini	كلاس 310
از ساعت 15 الی 15:30		
A weak approximation for the multiplicative Wiener-Hopf Factorization	Amir T. Payandeh Najafabadi and Dan Z. Kucerovsky	كلاس 306
Weak amenability of triangular Banach algebras of order three	A. Niazi Motlagh	كلاس 307
Majorization and its application to quantum mechanics	S. M. Manjegani and Sh. Moein	كلاس 308
Numerical solution of a Volterra's population model using the pantic B-spline scaling functions	A. Askari- Hemmat and Ensiyeh Sokhanvar	كلاس 310
از ساعت 16:45 الی 17:15		
The radon transform on homogenous spaces	R. A. Kamyabi, M. Janfada and T. Derikvand	كلاس 306
Bochner's Theorem and it's applications in operator inequalities	A. Sheikh Hosseini and Gh. Aghamollaei	كلاس 307
Operator duals for frames in Hilbert C^* -modules	A. Alijani	كلاس 308
Some properties of wright-convex functions	N. Eftekhari and M. Hosseini	كلاس 310

برنامه ارائه مقالات در روز پنجشنبه 93/11/2		
عنوان	نویسندگان	مکان ارائه
از ساعت 9 الی 9:30		
Does the character space of a commutative Banach Algebragenerate its dual?	M. Abtahi and S. Farhangi	کلاس 306
The Banachalgebras $A \times B \times C$	A. Khotanloo	کلاس 307
Hyperexpansive weighted conditional type operators	Y. Estaremi	کلاس 308
Matrix transformations on block sequence spaces	D. Foroutannia	کلاس 310
از ساعت 9:30 الی 10		
Fixed point characterization of amenable locally compact groups	F. Akhtari and R. Nasr-Isfahani	کلاس 306
A generalization of shearlet transform	V. Atayi and R. A. Kamyabi-gol	کلاس 307
Homotopy analysis method for fuzzy Boussinesq equation	A. Fallahzadeh and M. A. Fariborzi Araghi	کلاس 308
EP modular operators and triple reverse order law	J. Farokhi Ostad and M. Mohammadzadeh Karizaki	کلاس 310
از ساعت 11 الی 11:30		
Amenability of the second duals of a Banach algebra	S. Barootkoob and S. Mohammadzadeh	کلاس 306
On maps preserving strongly Lie zero-products	A. R. Khoddami	کلاس 307
A note on n-dimensional wavelets	A. Safapour Z. Yazdani Fard	کلاس 308

Average shadowing property for iterated function systems	M. Fatehi Nia	كلاس 310
از ساعت 11:30 الى 12		
Non-commutative convexity in Hilbert C^* -bimodules	M. Dehghani and M. Kian	كلاس 306
Character contractibility of $L_1(G/H)$	B. Olfatian Gillan and M. Ramezanzpour	كلاس 307
Function-valued Riesz representation theorem in $L^2(0,1)$	M. A. Hasankhani Fard	كلاس 308
Some results on limited operators in Banach lattices	H.Ardakani, M.Salimi and S.M.S.Modarres Mosadegh	كلاس 310
از ساعت 13:30 الى 14		
Heinz mean-type inequalities in operator algebras	S. M. Manjegani and A. Norouzi	كلاس 306
On C^* -convex sets in C^* -algebras	M. Kian	كلاس 307
Extremal behavior of regularly varying space-time stochastic Processes	M. Rezapour and V. Amirzadeh	كلاس 308
Riesz family of shifts of a finite number of functions on LCA-groups	R. A. Kamyabi-Gol, N. Mohammadian and R. Raisi Tousi	كلاس 310
از ساعت 14 الى 14:30		
Approximate amenability of archimedean semigroup algebras	M. Essmaili and M. Rostami	كلاس 306
A note on the higher rank numerical range and the generalized higher rank numerical range	N. Anjomshoaa	كلاس 307
On the Hausdorff sequence spaces which include the spaces l_p	D. Foroutannia	كلاس 308
On higher rank numerical hulls of matrix polynomials	Sh. Rezagholi Gh. Aghamollaei	كلاس 310

از ساعت 14:30 الی 15		
Harmonicity of invariant vector fields and left-invariant Ricci solitons on para-hypercomplex 4-dimensional Lie groups	M. Aghasi and M. Nasehi	كلاس 306
Composition and multiplication operators on Orlicz spaces	S. Shamsi Gamchi	كلاس 307
Complex functions preserving Perron-Frobenius property	F. Khalooei	كلاس 308
Fourier transforms and their application in reliability analysis	B. Afhami and M. Madadi	كلاس 310
از ساعت 15 الی 15:30		
Generalized dual frames for generalized frames	A. Alijani	كلاس 306
DG topological groups	M. R. Ahmadi Zand, N. Baeimani and R. Khyyeri	كلاس 307
Empirical convergence of the periodogram of Exponential CARMA process	V. Amirzadeh	كلاس 308
Some new results on the stability of frames in Hilbert C^* -modules	M. Simi	كلاس 310
از ساعت 15:30 الی 16		
W^* -approximate injectivity of dual Banach algebras	A. Mahmoodi and M. Shakeri	كلاس 306
A hybrid watermarking scheme by redundant wavelet transform and bidiagonal singular value decomposition	M. Mardanpour, M. A. Zare Chahooki	كلاس 307
A complete measure with applications in economics	S. Mohammadzadeh and S. Barootkoob	كلاس 308
Approximate midconvexity	N. Eftekhari and T. Abbasi beni	كلاس 310
